

A schematic diagram of a device 40. It consists of a horizontal rectangular body. On the left end, there is a circular component 41 with an 'X' inside. On the right end, there is a similar circular component 42 with an 'X' inside. In the center of the body is a rectangular component 43. Above component 43 is a label 44. Below the central part of the body, there are several vertical lines, suggesting a connection to a base or a specific mounting.

A schematic diagram of a device 40. It consists of a central rectangular component labeled PV, which is connected to two side components labeled 41 and 42. Component 41 is on the left and component 42 is on the right. Both 41 and 42 are represented by circles with an 'X' inside. The entire assembly is shown within a rectangular frame. A vertical line with diagonal hatching is positioned below the central component PV. Labels 40, 41, 42, and PV are placed near their respective components. Labels 43 and 45 are also present, pointing to the top and bottom of the central component PV respectively.
